The Board of Directors Inteligo Bank Ltd

# Report on the audit of the financial statements

## Opinion

We have audited the financial statements of Inteligo Bank Ltd. (the "Bank") which comprise the statement of financial position as at December 31 2016, and the income statement, statement of comprehensive income, statement of changes in shareholder's equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as at December 31, 2016, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Responsibilities of management and the Board of Directors for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Bank's financial reporting process.

## Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## 1. Corporate Information

Inteligo Bank Ltd. ("the Bank") was incorporated under the laws of The Commonwealth of The Bahamas in 1995 and is licensed by The Central Bank of The Bahamas to conduct various types of banking, financing and investment activities. The registered office of the Bank is located at Seventeen Shop Building, First Floor, Collins Avenue & Fourth Terrace, Centreville, Nassau, The Bahamas. The Bank is a wholly-owned subsidiary of Inteligo Group Corp., an entity incorporated under the laws of the Republic of Panama. Inteligo Group Corp. was acquired by Intercorp Financial Services Inc. on August 1<sup>st</sup>, 2014, from Intercorp Peru, Ltd., its majority shareholder, as part of a corporate reorganization. Intercorp Financial Services Inc. is a public company listed in the Lima Stock Exchange (Bolsa de Valores de Lima, BVL) under the ticker IFS.

The Bank established a branch in Panama ("the Branch"), on January 10<sup>th</sup>, 1997 under the laws of the Republic of Panama. The Branch operates under an international license issued by the Superintendence of Banks of Panama through resolution No. 26-96 of December 1996. The banking operations in Panama (primarily lending and borrowing activities) are subject to regulatory requirements and the supervision of the Superintendence of Bank of Panama, pursuant to Agreement No. 9 of February 26, 1998; as modified by Law Decree No.2 of February 22, 2008.

The financial statements were authorized for issuance according to resolution of the Board of Directors of Inteligo Bank Ltd. on March 16, 2017.

# 2. Statement of Compliance

The financial statements of Inteligo Bank Ltd. have been prepared in accordance with International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board ("IASB").

#### 3. Basis of Preparation of Financial Statements

#### 3.1 Basis of presentation

The financial statements have been prepared on an historical cost basis, except for the measurement at fair value of available-for-sale financial assets, trading securities and financial assets designated at fair value through profit or loss. The financial statements are presented in United States of America dollars (US\$) and all values are rounded to the nearest thousand (US\$000) except when otherwise indicated. The Bank presents its statements of financial position in order of liquidity.

(Amount expressed in thousands of US\$ dollars)

## **3.** Basis of Preparation of Financial Statements (continued)

#### 3.2 Standards issued but not yet effective

International Financial Reporting Standards or their interpretations issued but not yet effective as of the date of issue of the Bank's financial statements are listed below. The standards or interpretations listed are those which Management believes may have a significant effect on the disclosures, position or financial performance of the Bank when applied on a future date. The Bank intends to adopt these standards or interpretations when they enter into effect.

## IFRS 9 Financial Instruments

In July 2014, the IASB issued the final version of IFRS 9 *Financial Instruments* which replaces IAS 39 *Financial Instruments: Recognition and Measurement* and all previous versions of IFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. IFRS 9 is effective for annual periods beginning on or after January 1, 2018, with early application permitted. Except for hedge accounting, retrospective application is required, but providing comparative information is not compulsory. For hedge accounting, the requirements are generally applied prospectively, with some limited exceptions. The Bank is currently working in the assessment of the impact of these measures on the Financial Statements and expects to comply with them in due time. To the date of issue of these Financials, the impact cannot be reasonably estimated until further analysis is conducted.

#### IFRS 15 Revenue from Contracts with Customers

IFRS 15 was issued in May 2014 and establishes a new five-step model that will apply to revenue arising from contracts with customers. Under IFRS 15 revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

The new revenue standard will supersede all current revenue recognition requirements under IFRS. Either a full retrospective application or a modified retrospective application is required for annual periods beginning on or after January 1, 2018. Early adoption is permitted.

In May 2014, the IASB issued IFRS 15 *Revenue from Contracts with Customers*, effective for periods beginning on 1 January 2018 with early adoption permitted. IFRS 15 defines principles for recognizing revenue and will be applicable to all contracts with customers. However, interest and fee income integral to financial instruments and leases will continue to fall outside the scope of IFRS 15 and will be regulated by the other applicable standards (e.g., IFRS 9, and IFRS 16 *Leases*).

Revenue under IFRS 15 will need to be recognized as goods and services are transferred, to the extent that the transferor anticipates entitlement to goods and services. The standard will also specify a comprehensive set of disclosure requirements regarding the nature, extent and timing as well as any uncertainty of revenue and corresponding cash flows with customers. The Bank does not anticipate early adopting IFRS 15 and is currently evaluating its impact.

(Amount expressed in thousands of US\$ dollars)

## **3.** Basis of Preparation of Financial Statements (continued)

## IFRS 16 Leases

IFRS 16 was issued in January 2016 and it replaces IAS 17 *Leases*, IFRIC 4 *Determining whether an Arrangement contains a Lease*, SIC-15 *Operating Leases-Incentives* and SIC-27 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under IAS 17. The standard includes two recognition exemptions for lesses – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognise the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under IFRS 16 is substantially unchanged from today's accounting under IAS 17. Lessors will continue to classify all leases using the same classification principle as in IAS 17 and distinguish between two types of leases: operating and finance leases.

IFRS 16 also requires lessees and lessors to make more extensive disclosures than under IAS 17. IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Early application is permitted, but not before an entity applies IFRS 15. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs.

# IAS 7 Disclosure Initiative - Amendments to IAS 7

The amendments to IAS 7 *Statement of Cash Flows* are part of the IASB's Disclosure Initiative and require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. On initial application of the amendment, entities are not required to provide comparative information for preceding periods. These amendments are effective for annual periods beginning on or after 1 January 2017, with early adoption allowed.

(Amount expressed in thousands of US\$ dollars)

## **3.** Basis of Preparation of Financial Statements (continued)

## 3.3 Significant accounting judgments and estimates

#### Judgment

The preparation of the financial statements in conformity with International Financial Reporting Standards requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on Management's best knowledge of current events and actions, actual results may ultimately differ from those estimates.

## Estimates

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised and in any future years affected.

The estimates and assumptions are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### (a) Loan impairment allowance and losses

The Bank reviews its loan portfolio at least monthly to determine if there is objective evidence of impairment in a loan or groups of loans which share similar credit risk characteristics.

The Bank seeks to use collateral, where possible, to mitigate its risk on financial assets. The fair value and the total amount disbursed do not exceed 60% of the market value of the investment portfolio given as guarantee. If the collateral deteriorates, the Bank has the right to request a margin from the borrower or to proceed with the execution of the guarantee.

The Bank makes its best judgment as to whether there is any observable data indicating that there is a significant decrease in the recoverable amount of a portfolio of loans using estimates based on historical loss experience for loans with similar characteristics.

If there is objective evidence that an impairment loss on loans and receivables exists, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the statement of income. The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

## **3.** Basis of Preparation of Financial Statements (continued)

Future cash flows in a group of loans that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the loans and historical loss experience for loans with similar credit risk characteristics.

When a loan is uncollectible, it is written off against the related allowance for loan losses. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are recognized in the statement of income.

Management believes that the allowance for loan losses is adequate. The regulatory agencies in certain jurisdictions, as an integral part of their examination process, periodically review the allowance for loan losses. Such agencies may require additions to the allowance to be recognized based on their evaluation of information available at the time of their examinations. Regulatory loan loss allowance requirements that exceed the Bank's allowance for loan losses are treated as an appropriation of retained earnings.

#### (b) Impairment of securities

The Bank determines that securities are impaired when there has been a significant and prolonged decline in the fair value as compared to the carrying value. The determination of what significant or prolonged means requires judgment. The Bank evaluates, among other factors, historical share price movement and the extent to which the fair value of an investment has been reduced or lies below its cost.

#### (c) Fair value of financial instruments

The Bank determines the fair values of certain financial instruments by means of valuation techniques that use a significant amount of inputs, not necessarily based on observable data, when these unobservable inputs have a significant effect on the instruments' valuation.

Availability of observable market prices and model inputs reduces the need for management judgment and estimation; and therefore the possible uncertainty associated with the determination of fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

(Amount expressed in thousands of US\$ dollars)

## **3.** Basis of Preparation of Financial Statements (continued)

As stated above, for more complex instruments the Bank uses proprietary valuation models, which are usually developed from recognized valuation models. Some or all of the significant inputs used in these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for selection of the appropriate valuation technique, determination of expected future cash flows on the financial instrument being valued, determination of the probability of counterparty default and for the selection of appropriate discount rates.

The Bank has an established control framework with respect to the measurement of fair values. This framework includes a portfolio valuation function, which is independent of front office management. Specific controls include: verification of observable pricing inputs and performance of model valuations; a review and approval process for new models and changes to existing models; calibration and back testing of models against observed market transactions; and review of significant unobservable inputs and valuation adjustments.

Regardless of the established control framework, the economic environment prevailing during recent years has increased the degree of uncertainty inherent in these estimates and assumptions.

Fair value estimates are made at a specific date based on relevant market estimates and information about the financial instruments. The Bank holds financial instruments for which limited or no observable market data is available. Fair value measurements for these instruments fall within Level 3 of the fair value hierarchy of IFRS 7. These fair value measurements are based primarily upon managements` own estimates and are often calculated based on the Bank's current pricing policy, the current economic and competitive environment, the characteristics of the instrument, credit, interest, and currency rate risks and other such factors. Therefore, the results cannot be backed by comparison to prices quoted in active markets, and may not be fully realized in a sale or immediate settlement of the asset or liability. Additionally, there are inherent uncertainties in any fair value measurement technique, and changes in the underlying assumptions used, including movements in discount rates, liquidity risks, and estimates of future cash flows that could significantly affect the fair value measurement amounts.

# 3.4 Going Concern

The Bank's Management has made as assessment of the Bank's ability to continue as a going concern and is satisfied that the Bank has the resources to continue in business for the foreseeable future. Furthermore, the Management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

(Amount expressed in thousands of US\$ dollars)

## 4. Summary of Significant Accounting Policies

## Cash and cash equivalents

For presentation purposes, in its statement of cash flows, the Bank considers as cash and cash equivalents all highly liquid instruments with initial maturities of three months or less. As of December 31, 2016, cash and cash equivalents are represented by cash and bank deposits.

## Fair value of financial instruments

Financial instruments are used by the Bank to manage market risk, facilitate customer transactions, hold proprietary positions and meet financing objectives. Fair value is determined by the Bank based on available listed market prices or broker price quotations. Assumptions regarding the fair value of each class of financial assets and liabilities are fully described in Note 20 to the financial statements.

#### **Financial assets**

The Bank recognizes, in compliance to IAS 39, four classes of financial assets: Financial assets at fair value through profit or loss, loans and receivables, available for sale and held to maturity investments. The classification depends on the purpose for which the financial assets were acquired and on their intended use. Management determines the classification of its financial assets at initial recognition or acquisition, whichever comes first.

Further detail on each of the four categories is provided below.

Financial assets at fair value through profit or loss. This category has two subcategories:

- § Designated upon initial recognition. The first includes any financial asset that is designated on initial recognition as one to be measured at fair value with fair value changes affecting the profit or loss statement.
- § Held for trading. The second category includes financial assets that are held for trading. All derivatives (except those designated as hedging instruments) and financial assets acquired or held for the purpose of selling in the short term or for which there is a recent pattern of short-term profit taking are classified as held for trading.

Available for sale financial assets (AFS) are any non-derivative financial assets designated on initial recognition as available for sale. AFS assets are measured at fair value in the statement of financial position. Fair value changes on AFS assets are recognized directly in equity, through the statement of comprehensive income, except for interest on AFS assets (which is recognized in income on an effective yield basis), impairment losses, and foreign exchange gains or losses. The cumulative gain or loss that was recognized in equity is recognized in profit or loss when an available for sale financial asset is derecognized.

(Amount expressed in thousands of US\$ dollars)

# 4. Summary of Significant Accounting Policies (continued)

*Loans and receivables* are non-derivative financial assets with fixed or determinable payments, originated or acquired, that are not quoted in an active market, not held for trading, and not designated on initial recognition as assets at fair value through profit or loss or as available for sale. Loans and receivables are measured at amortized cost using the effective interest rate method.

*Held to maturity investments* are non-derivative financial assets with fixed or determinable payments that an entity intends and is able to hold to maturity and that: do not meet the definition of loans and receivables and are not designated on initial recognition as assets at fair value through profit or loss or as available for sale. Held to maturity investments are measured at amortized cost. If an entity sells a held-to-maturity investment other than in insignificant amounts or as a consequence of a non-recurring, isolated event beyond its control that could not be reasonably anticipated, all of its other held-to-maturity investments must be reclassified as available-for-sale for the current and next two financial reporting years.

# **Financial liabilities**

The Bank recognizes, in compliance to IAS 39, two classes of financial liabilities:

*Fair value through profit or loss:* Include financial liabilities held for trading, derivatives and financial liabilities designated as at fair value through profit or loss on initial recognition. All gains and losses are recognized in the profit or loss statement.

*Amortized cost:* All financial liabilities not classified at fair value through profit or loss are measured at amortized cost using the effective interest method.

# Borrowings

After initial recognition, borrowings are subsequently measured at amortized cost using the effective interest rate method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well through the effective interest rate amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate is included as interest expenses in the statement of income.

# **Derivative financial instruments**

Derivatives are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value. Fair values are obtained from quoted market prices in active markets, including recent market transactions; or using valuation techniques, including discounted cash flows models and options pricing models, as appropriate. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

(Amount expressed in thousands of US\$ dollars)

## 4. Summary of Significant Accounting Policies (continued)

The derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognized immediately in the statement of income under "Gain on financial instruments, net". Gains and losses arising from changes in the fair value of derivatives that are managed in conjunction with designated financial assets are also included in "Gain on financial instruments, fair value.

## Initial recognition and measurement

The Bank uses a classification of financial asset or a financial liability depending on the purposes for which they were acquired and their characteristics. All financial assets or liabilities are recorded at their fair value plus, in the case of financial assets and financial liabilities not at fair value through profit or loss, any directly attributable incremental costs of acquisition or issue. Financial assets and liabilities carried at fair value through profit or loss are initially recognized at fair value and transaction costs are expensed in the statement of income. A regular way purchase or sale of financial assets and liabilities is recognized and derecognized using either trade date or settlement date accounting. The Bank has adopted the method of trade accounting to recognize its financial assets and liabilities; this method has been applied consistently for all purchases and sales of financial assets and liabilities that belong to the same category of financial assets and liabilities.

# Measurement subsequent to initial recognition

Subsequently, the Bank measures their financial assets and liabilities (including derivatives) at fair value, with the following exceptions:

Loans and receivables, held to maturity investments, and non-derivative financial liabilities, which have been measured at amortized cost using the effective interest method.

Financial assets and liabilities that are designated as a hedged item or hedging instrument are subject to measurement under the hedge accounting requirements.

#### **Determination of fair value**

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. For its available-for-sale financial assets the Bank uses quoted market prices in an active market or dealer prices, which are the best evidence of fair value, where they exist, to measure the financial instrument. For investments where there is no active market, fair value is determined using valuation techniques such as: recent arm's length market transactions; reference to the current market value of a substantially similar instrument; discounted cash flow analysis or other valuation models. The fair value of investment funds is determined by reference to the net asset values of the funds as provided by the respective administrators of such funds; reviewed in order to determine the appropriateness of the reported balance or whether adjustments are necessary.

(Amount expressed in thousands of US\$ dollars)

## 4. Summary of Significant Accounting Policies (continued)

After initial measurement, available for sale financial assets are subsequently measured at fair value with unrealized gains or losses recognized in the Statement of Comprehensive Income and credited in the available for sale reserve until the investment is derecognized, at which time the cumulative gain or loss is recognized in gain (loss) on financial instruments, available for sale, or the investment is determined to be impaired, and the cumulative loss is reclassified from the available for sale reserve to the statement of income as an impairment loss on securities available for sale. Interest earned for holding available for sale financial assets is reported as interest income using the effective interest rate method.

Amortized cost is calculated using the effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the net carrying amount of the financial asset or liability.

## Derecognition of financial assets and financial liabilities

Financial assets are derecognized when the rights to receive cash flows from the investments have expired or have been transferred and the Bank has transferred substantially all risks and rewards of ownership. When securities classified as available-for-sale are sold or impaired, the accumulated fair value adjustments recognized in equity are included in the statement of income as gains and losses on financial instruments, available for sale.

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of the existing liability are substantially modified, such an exchange or modification is treated as de-recognition of the original liability, and the difference in the respective carrying amounts is recognized in profit or loss.

#### Interest income and expense

Interest income and expense is recognized in the statement of income for all interest-bearing instruments on an accrual basis applying the effective interest method to the actual purchase price. Interest income includes coupons earned on fixed income investment and accredited discount on debt instruments. When a loan becomes of doubtful collection, it is written down to recoverable amount and interest income is thereafter recognized at the rate of interest which had been used to discount the future cash flows for the purpose of determining the recoverable amount.

#### Fees and commissions income

Fees and commissions are generally recognized on an accrual basis once service has been rendered. Loan origination fees, when charges, are deferred and recognized over the life of the loan.

#### Dividend income

Dividend income (including from available-for-sale investments) is recognized when the Bank's right to receive the payment is established, which is generally when the shareholders approve the dividend.

(Amount expressed in thousands of US\$ dollars)

## 4. Summary of Significant Accounting Policies (continued)

#### **Foreign currency operations**

The Bank's transactions are performed mostly in U.S. dollars, its functional and reporting currency. Foreign currency transactions are translated into U.S. dollars at the prevailing exchange rates on the date of the transaction. Foreign exchange gains or losses resulting from the settlement of such transactions and from the translation of monetary assets are measured at the date of the statement of financial position and liabilities denominated in foreign currencies are recognized in the statement of income.

Translation differences on debt securities and other financial assets measured at fair value are included as foreign exchange income in the statement of income with the exception of differences on foreign borrowing that provide an effective hedge against a net investment in a foreign security: these are taken directly to equity until the disposal of the net investment, at which time they are recognized in the statement of income.

## Property, furniture, equipment and improvements

Property, furniture, equipment and improvements are stated at cost, less accumulated depreciation and amortization. Depreciation and amortization are calculated on a straight-line basis over the useful life of the assets as follows:

Property	30 years
Improvements	5 years
Furniture and office equipment	2 to 3 years
Vehicles	5 years

The carrying values of furniture, equipment and improvements are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

#### Intangible assets

Costs associated with maintaining computer software programs are recognized as an expense when they are incurred. Costs that are directly associated with identifiable and unique software products controlled by the Bank and that will generate economic benefits exceeding costs beyond one year, are recognized as intangible assets.

Expenditures which enhance or extend the performance of computer software programs beyond their original specifications are recognized as a capital improvement and therefore added to the original cost of the software. Computer software costs recognized as assets are amortized using the straight-line method over their useful lives, not exceeding 5 years.

(Amount expressed in thousands of US\$ dollars)

## 4. Summary of Significant Accounting Policies (continued)

#### **Fiduciary activities**

Assets and income arising from fiduciary activities, together with related undertakings to deliver such assets to customers, are excluded from these financial statements if the Bank acts in a fiduciary capacity such as a nominee, trustee or agent, as they are not assets of the Bank.

#### Interest income compensation

For presentation purposes, interest income received by Inteligo Bank Ltd. from its Panama Branch as payment for funds received by the latter to finance lending operations booked in Panama is compensated against the interest expense account of the Panamanian branch. At December 31, 2016, the compensation amounted was US\$5,861 (2015: US\$5,581). This amount constitutes an elimination on the consolidation process.

#### **Income taxes**

The Bank operations are tax exempted in both jurisdictions, the Commonwealth of The Bahamas and the Republic of Panama.

# 5. Cash and Deposits with Banks

	December 31,		
	2016	2015	
	<b>US\$ 000</b>	US\$ 000	
Cash	9	13	
Demand deposits with banks	134,303	96,908	
Time deposits with banks	90,670	56,170	
Cash and cash equivalents	224,982	153,091	
Less: deposits over 90 days	(50,000)	-	
	174,982	153,091	

At December 31, 2016, the annual interest rates on demand and time deposits ranged from 0.39% to 6.04% (2015: 0.03% to 0.05%) with maturities in the range of 0/180 days.

All counterparts are at least BBB- credit rating.

(Amount expressed in thousands of US\$ dollars)

# 6. Securities

Securities are summarized as follows:

## **Securities at Fair Value**

	December 31,	
	2016 US\$ 000	2015 US\$ 000
Corporate bonds	1,377	8,298
Equity shares and mutual funds	348	-
Structured products	135	-
Derivatives financial instruments	193	(1,950)
	2,053	6,348

The portfolio of securities detailed above is comprised mainly of a small portfolio of bonds (US\$1,377 Book Value), a single position in both mutual funds and structured products, bought with the purpose of providing liquidity to clients invested in those assets; as well as derivative financial instruments that are part of an investment portfolio managed by PIMCO.

During 2016 the Bank bought securities at fair value for US\$46,414 (2015: US\$453,327), sold securities for US\$52,902 (2015: US\$469,556), redeemed securities for US\$80 (2015: US\$1,651).

During 2015, the Bank sold its total position in GDR's -218,554 shares - for a price of US\$117.67 per share, for a total of US\$25,717. The operation yielded a gain of US\$4,193.

(Amount expressed in thousands of US\$ dollars)

#### 6. Securities (continued)

#### Securities Available for Sale

The third party administrated portfolio it's mainly composed of corporate bonds US\$57,526, US government bonds US\$26,224, collateralized mortgage obligations US\$17,278, asset back securities US\$6,545, equity US\$1,562, Repo US\$2,000, cash US\$6,975 and mutual funds US\$9,092 (2015: corporate bonds US\$18,095, US government bonds US\$11,240, collateralized mortgage obligations US\$29,011, asset backed securities US\$6,278, equity US\$1,541, cash US\$4,600 and mutual fund US\$14,191).

During 2016, the Bank bought securities available for sale for US\$231,207 (2015: US\$183,449), sold securities for US\$129,957 (2015: US\$218,853) and redeemed securities for US\$0 (2015: US\$6,071). These numbers do not account for transactions carried out by the administrators of the portfolios managed both by PIMCO and Armory Advisors LLC.

During 2016, there were no impairment losses for securities available for sale (2015: US\$9,239). In 2015, impairments for US\$6,272 were related to investments in mining equity and funds, US\$2,600 to diversified investments, mainly in the fixed income asset class and US\$367 to equity investments in fishing related companies.

The coupon rate on fixed-rate bonds classified as available for sale ranged from 5.375% to 11% p.a. (2015: 5.375% to 10.75% p.a.). Furthermore, the bond portfolio is comprised of floating-rate securities, with coupons based on the corresponding Libor rate plus a spread that ranged from 4% to 4.90% p.a.; as well as a yankee certificate of deposit at a rate of 1.05% p.a.

(Amount expressed in thousands of US\$ dollars)

#### 6. Securities (continued)

Securities for both the available for sale and fair value portfolios, classified by type of interest, are shown below:

	December 31,	
	2016	2015
	<b>US\$ 000</b>	US\$ 000
Fixed rate	72,608	40,926
Floating Rate	25,000	-
Equity (non-interest bearing)	60,710	54,954
Structured Products	381	-
Funds (mixed)	145,378	130,500
Third party administered funds (mixed)	127,396	86,093
	431,473	312,473

The Bank uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation techniques:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: valuation techniques for which the lowest input that is significant to the fair value measurement is directly or indirectly observable.

Level 3: valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

	<b>December 31, 2016</b>			
	Level 1	Level 2	Level 3	Total
	US\$000	US\$000	US\$000	US\$000

Third party administrated portfolio	-	88,043	-	88,043
Corporate bonds	12,628	20,000		32,628
	31,596	159,805	114,724	306,125

The fair value of the investments is calculated as the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair value:

- Fair value of quoted debt securities and shares is based on quoted market prices in active markets at the reporting date. When not available, fair value is determined by reference to quoted market prices for similar instruments, adjusted as appropriate to the circumstances of the instruments.
- Fair value of private investment funds depends on the underlying assets in their portfolios. If the assets are quoted bonds, shares or derivatives, fair value is based on market prices at the reporting date. If the assets are private debt or equity, fair value is estimated using a discounted cash flow (DCF) model. The valuation requires management to make certain assumptions about the model inputs, including forecast cash flows, the discount rate, credit risk and volatility. The probabilities of the various estimates within the range can be reasonably assessed and are used in management's estimate of fair value for these unquoted investments.

## 6. Securities (continued)

The table below shows a description of significant unobservable inputs to valuation:

	Valuation technique	Significant unobservable inputs	Value	Sensitivity of the input to fair value
Private Equity Fund - Pharmaceutical sector	DCF Method	Sales Forecast	Sector Analysts Median Estimates	10% increase (decrease) in the sales forecast would result in increase (decrease) in fair value by US\$3,184
		WACC	8% / Depending on each royalty	<ul><li>500 basis points increase in the WACC would result in decrease in fair value by US\$ 5,844</li><li>500 basis points decrease in the WACC would result in increase in fair value by US\$8,750</li></ul>
Mutual Funds and Investment Participations	DCF Method	Discount Rate	According to Credit Risk	<ul><li>500 basis points increase in the discount rate would result in decrease in fair value by US\$3,416</li><li>500 basis points decrease in the discount rate would result in increase in fair value by US\$3,174</li></ul>
	Comparable multiples	Price/Sales Ratio	According to Market Sector	10% increase (decrease) in the sales forecast would result in increase (decrease) in fair value by US\$230

The tables below include a reconciliation of fair value measurement of financial instruments classified by the Bank within level 3 of the valuation hierarchy:

	201	6	2015		
	Securities			Securities	
	Securities at	Available	Securities at	Available

(Amount expressed in thousands of US\$ dollars)

#### 7. Loans, Net

The position of the loan portfolio is summarized below:

	December 31,		
	2016	2015	
	<b>US\$ 000</b>	US\$ 000	
Financial	42,442	48,252	
Commercial	37,151	41,554	
Industrial	24,023	23,580	
Services	88,885	107,762	
Construction and real estate	115,731	93,450	
Fishing and agriculture	19,990	14,028	
Consumer	169,075	156,957	
Mortgages	362	449	
	497,659	486,032	
Less allowance for loan losses	1,079	1,079	
	496,580	484,953	
Accrued interest receivable	9,814	10,119	
	506,394	495,072	

In addition to the allowance for loan losses, for compliant to Central Bank of the Commonwealth of the Bahamas Supervisory and Regulatory Guidelines 2003-05 Credit Risk Management, the Bank holds a Regulatory Reserve amount for US\$1,727 at December 2016.

At December 31, 2016, the annual interest rates on loans ranged from 0.65% to 16% (2015: 0.65% to 12.25%), and the weighted average interest rate was 4.98% (2015: 5.12%).

The classification of the loan portfolio by type of interest rate is summarized below:

	Decemb	<u>oer 31,</u>	
	<b>2016</b> 2015		
	<b>US\$ 000</b>	US\$ 000	
Fixed rate	324,657	339,357	
Variable rate (Libor or Prime)	173,002	146,675	
	497,659	486,032	

(Amount expressed in thousands of US\$ dollars)

# 7. Loans, Net (continued)

Loans are secured as follows:

	December 31,		
	2016	2015	
	US\$ 000	US\$ 000	
Cash	318,541	306,942	
Securities	149,499	140,910	
Mortgages	-	1,370	
Others	27,883	27,418	
Without collateral	1,736	9,392	
	497,659	486,032	

Changes in the allowance for loan losses are summarized below.

	December 31,		
	2016	2015	
	US\$ 000	US\$ 000	
Balance at January 1	1,079	480	
Allowance changes to expense	<u> </u>	599	
Balance at December 31	1,079	1,079	

At December 31, 2016, there were no past due, non-accruing, impaired or renegotiated loans.

The table below represents an analysis of the loans, by the credit rating internal designation used by the Bank as of December 31, based on the capacity of the obliged to meet its financial commitments:

	December 31,		
	2016	2015	
	<b>US\$ 000</b>	US\$ 000

Furniture and Equipment includes software licenses with a cost of US\$6,042 (2015: US\$6,049), of which US\$5,836 correspond to the new banking core, in use since January 2015. The amortization on these licenses amounts to US\$12,395 (2015: US\$11,304). The Bank depreciates software on a straight-line, 3 year basis, except for the Temenos T24R10 banking core which depreciates in 5 years from February 2016, with a residual value of zero.

(Amount expressed in thousands of US\$ dollars)

## 8. Furniture, Equipment and Improvements, Net (continued)

On January 4, 2016, the Bank acquired floors 47 and 48 of the PH Torre Financial Center building, for a price of US\$6,500. This addition is detailed above under the heading *Property*. Upon signing the contract, Inteligo Bank received a rebate equivalent to the amount outstanding at December 31, 2015 of the rent paid in advance for the period of five years starting on July 1<sup>st</sup> 2013; for a total of US\$1,311. The net cash disbursement generated by this operation was therefore US\$5,189.

## 9. Securities Sold Pending Settlement and Securities Purchased Pending Settlement

The Bank recognizes each sale and purchase of financial instruments on the trade date. At such date, the purchased instrument is recognized as an asset (securities sold pending settlement) and the instrument sold is recognized as a liability (securities purchased pending settlement). The settlement of the transaction generally occurs within three working days following the trade date. The period between the trade date and the settlement date varies depending on the type of financial instrument traded and the regulations in effect when the negotiation occurred.

#### 10. Other Assets

Other assets are shown below:

	December 31,		
	2016	2015	
	US\$ 000	US\$ 000	
Accounts receivable	1,262	7,511	
Accrued commissions	11,385	5,417	
	12,647	12,928	

#### 11. Time Deposits with Banks, Due to Depositors and Borrowings

The annual interest rates in time deposits with banks and due to depositors are shown below:

	December 31,		
	2016	2015	
	%	%	
Deposits with banks:			
Interest rate range	0.00% to 1.35%	0.03% to 0.05%	
Weighted average interest rate	1.05%	0.05%	
Due to depositors:			
Non banks:			
Interest rate range	0.30% to 12.50%	0.10% to 11.00%	
Weighted average interest rate	3.20%	3.21%	

#### 12. Borrowings

As of December 2016, outstanding lines of credit are as follows:

	December 31,		
	<b>2016</b> 2015		
	<b>US\$ 000</b>	US\$ 000	
Outstanding balance revolving line of credit	20,000	20,000	
	20,000	20,000	

During 2015, the Bank repaid the entire outstanding balance owed to the Royal Bank of Canada for the line of credit approved in 2012 with a revolving limit of up to US\$40,000.

In June 2015, Bank J. Safra Sarasin approved a new facility in the form of a revolving line of credit for up to US\$20,000 to the Bank. At December 31, 2016 the outstanding balance for this line is shown in the table above. The Bank may borrow, repay and re-borrow up to a maximum of US\$20,000. Interest expense for the year was US\$237 (2015: US\$188). Borrowings are collateralized by portfolio of investments.

	December 31,		
	<b>2016</b> 2015		
	%	%	
Borrowings			
Interest rate range	1.13% to 1.29%	0.88% to 1.12%	
Weighted average interest rate	1.18%	0.95%	

(Amount expressed in thousands of US\$ dollars)

## 13. Share Capital

At December 31, 2016, the Bank's capital is comprised of 20,000 (2015: 20,000), common shares issued and outstanding with a par value of US\$1 (2015: US\$1) each.

During the year ended December 31, 2016, the Bank declared and paid a dividend of US\$28,200 (2015: US\$16,200) respectively or US\$1.41 per share (2015: US\$0.81 per share).

#### 14. Income Taxes

As of December 31, 2016 there was no income tax liability reflected in the financial statements, as there is no income tax imposed by the Government of The Commonwealth of The Bahamas. In accordance with the current tax regulations in Panama, the Branch is exempt from the payment of income taxes on profits derived from foreign operations. In addition, profits derived from interest earned on time deposits and interest earned from Panamanian Government securities is also exempt from the payment of income taxes.

There are no income taxes imposed on the Bank in the Commonwealth of The Bahamas. Value Added Tax (VAT) of 7.50% is paid on almost all local purchases, however all amounts paid can be reclaimed by filing an application with the Inland Revenue Department of the Commonwealth of the Bahamas, due to the classification of the Bank as zero rated for VAT.

#### 15. Gain on Financial Instruments, Net

The net gain on financial instruments included in the statement of income is summarized as follows:

	December 31,		
	2016	2015	
	<b>US\$ 000</b>	US\$ 000	
Unrealized gain on securities at fair value	3,549	800	
Realized gain on securities at fair value	246	4,083	
Realized gain (loss) on securities available for sale	11,269	(1,699)	
	15,064	3,184	

(Amount expressed in thousands of US\$ dollars)

# 16. General and Administrative Expenses

	December 31.		
	2016	2015	
	US\$ 000	US\$ 000	
Salaries and employee benefits			
Salaries	3,725	4,663	
Social security	253	227	
Employee benefits	3,430	1,996

Office supplies	14	27	
Travel	189	305	
Insurance	238	237	
Other	1,501	1,602	
	3,304	3,579	

(Amount expressed in thousands of US\$ dollars)

### **17.** Commitments and Contingencies

In the normal course of business, the Bank has commitments and contingencies which are not reflected in the statement of financial position and involve certain levels of credit and liquidity risk.

#### a) Customer Credit

#### Stand-by letters of Credit and Credit Facilities

Letters of credit imply certain exposure to credit loss in the event of non-compliance of the customer, net of collateral guarantees securing these transactions. The Bank's credit policies and procedures to approve these commitments are similar to those for extending loan facilities.

It is the Management's opinion that the Bank will not incur any losses from these commitments on behalf of customers. These commitments are summarized below:

	Decemb	<u>ber 31,</u>	
	2016	2015	
	US\$ 000	US\$ 000	
Stand by letters of credit	7,471	6,467	
Lines of credit to be disbursed	31,360	24,555	

#### Consumer Credit - Visa

As of December 31, 2016, the Bank had outstanding revolving lines of credit available to its credit card customers for US\$8,108 (2015: US\$7,776). The unused portion of the total credit facility available amounted to approximately US\$7,166 (2015: US\$6,709). While these amounts represent the available lines of credit to customers the Bank has not experienced and does not anticipate, that all of its customers will use their entire available lines at any given point in time. The Bank generally has the right to increase, decrease, cancel, alter or amend the terms of these lines at any time.

#### b) Lease Agreements

On January 4, 2016, the Bank acquired floors 47 and 48 of the PH Torre Financial Center building, for a price of US\$6,500.

Upon signing the contract, it received a rebate equivalent to the amount outstanding at December 31, 2015 of the rent paid in advance for the period of five years starting on July 1<sup>st</sup> 2013; for a total of US\$1,311; effectively ending the lease contract for the abovementioned assets. The net cash disbursement for this operation, after applying the rebates, was therefore US\$5,189.

The rental expense for office space in 2016 amounted to US\$57 (2015: US\$746) and includes only costs related to the office in The Bahamas. Rental expense of other equipment amounted to US\$26 for 2016 (2015: US\$138).

# **17.** Commitments and Contingencies (continued)

## c) Contingencies

Inteligo Bank Ltd. is involved in legal proceedings in the ordinary course of its banking operations. Inteligo Bank Ltd. has been named as a defendant in the following litigation matters, which seek a total recovery of approximately US\$11 million:

- § Lawsuit brought by the BVI liquidators of Fairfield Sentry Limited and Fairfield Sigma Limited (together, "the Fairfield Funds"), filed September 2, 2010; and
- § Lawsuit brought by the U.S. trustee for the liquidation of Bernard L. Madoff Investment Securities LLC ("BLMIS"), filed October 6, 2011.

These lawsuits seek the return of certain redemption payments received by Inteligo Bank Ltd. as a result of investments in the Fairfield Funds. The Fairfield Funds were BVI funds that invested substantially all of their assets into BLMIS. Inteligo's redemption payments were less than its subscription payments. Inteligo believes that the liability risk associated with these cases is remote and, as such, we have not recognized a provision in regards to these litigation matters.

# 18. Commission Income

Administration services of trust assets and third party securities generate several types of commission income including but not limited to: fees relating to trading of structured notes based on a certain spread over face value for each particular note, fund subscription and redemption fees when applicable, custody fees and portfolio management fees. This type of income amounted to US\$31,223 in 2016 (2015: US\$37,774).

## **19. Balance and Transactions with Related Parties**

The statement of financial position and statement of income include balances and transactions with related parties, which are summarized as follows:

	Directors and Key Management Personnel		Rela Compo	
	2016	2015	<b>2016</b>	2015
Assets	US\$ 000	US\$ 000	US\$ 000	US\$ 000
Securities	-	-	35,247	17,574
Other assets	4,304	-	1,000	1,000
Interest receivables	96	-	35	40
Liabilities				
Demand deposits	-	-	10,071	4,657
Time deposits	-	-	2,640	21,000
Interest payable	-	-	30	36
Interest income:				
Loans	59	-	171	52
Interest expense:				
Deposits	-	-	97	264
<b>Income from financial services</b> <b>and other items:</b> Commission income	-	-	270	4
General and administrative expenses				
Key management salaries	1,100	1,100	-	-
Professional fees	-	-	4,800	4,200

Transactions with related parties include mainly fixed-income security operations with coupon rates ranging from 5.25% to 8.5% and maturities or call schedules within the next ten years; as well demand and time deposits from related companies. In the case of time deposits, interest rates are in the range of 0.50% to 4.00% p.a. and maturities within the first semester of 2016. Demand deposits do not generate interest. Furthermore, key management salaries are also shown in the table above; as well as various receivables from key management personnel.

#### 20. Fair Value of Financial Instruments

The following assumptions, when practical, have been made by Management to estimate the fair value for each financial instruments category in the statement of financial position:

a) Cash and deposits with banks/accrued interest receivable/demand deposits due to customers/accrued interest payable/other liabilities.

For the financial instruments described above, the carrying values approximate their fair value due to their short term nature.

b) Securities

For securities, the fair value is based on published market price quotations, quotes from electronic pricing systems, net asset value provided by fund administrators, quotations provided by banks and estimates based on internal models of valuation. Unquoted equity securities classified as available for sale, whose fair value cannot be reliably measured are carried at cost.

c) Loans

The fair value of the loan portfolio is determined by discounting the future cash flows using interest rates that represent: (i) current market rates, and (ii) future expected interest rates, for a term that takes into account the expected anticipated prepayments in the loan portfolio.

d) Demand and time deposits from customers

The fair value of these financial instruments was determined by discounting the future cash flows using interest rate that reflect: (i) current market rates, and (ii) future expected interest rates, for a term that represents the remaining life of these instruments.

The following table summarizes the carrying value and the fair value of the Bank's significant financial assets and liabilities.

	December 31,						
-	201	6	201	5			
	Carrying	Fair	Carrying	Fair			
	Value	Value	Value	Value			
	<b>US\$ 000</b>	<b>US\$ 000</b>	US\$ 000	US\$ 000

(Amount expressed in thousands of US\$ dollars)

## 21. Financial Risk Management

A financial instrument is any contract that originates a financial asset in one entity and a financial liability or equity instrument in another entity. The Bank's statement of financial position is primarily comprised of financial instruments.

The Bank's Board of Directors is responsible for the establishment and monitoring of the risk administration policies for financial instruments. In order to manage and monitor the various risks the Bank is exposed to, the Board of Directors has created the Credit and Investment Committee, the Assets and Liabilities Committee, the Credit Risk Committee and the Audit Committee. These committees are engaged in managing these risks and in making periodic reviews. In addition, the Bank is subject to the regulations of The Central Bank of The Bahamas concerning the risks of liquidity, credit and levels of capitalization, among others.

The significant risks identified by the Bank are credit, counterparty, liquidity, market risk, other market price and capital management which are described as follows:

#### a) Credit Risk

This is the risk that the debtor or issuer of a financial asset owned by the Bank does not fully and timely comply with any payment, in conformity with the terms and conditions agreed when the respective financial asset was acquired or originated by the Bank.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as follows:

	December 31,		
	2016	2015	
	<b>US\$ 000</b>	US\$ 000	
Deposits with banks	224,982	153,078	
Securities	431,473	312,473	
Loans	497,659	486,033	
Securities sold pending settlement	117	547	
Accrued interest receivable	9,814	10,118	
Other assets	12,647	12,928	
	1,176,692	975,177	

To mitigate credit risk, the Bank's policies establish limits by country, industry, and debtor. The Committee appointed by the Board of Directors, periodically oversees the financial condition of debtors and issuers of financial instruments that involve risk for the Bank. To mitigate credit risk, the Bank's risk management policies establish the following:

### 21. Financial Risk Management (continued)

- Financing granted by the Bank to its clients is within financing limits established by the Board of Directors, as well as within the requirements established by The Central Bank of The Bahamas and the Superintendence of Banks of Panama. Exposure limits are applied to individuals and economic groups.
- The Bank limits exposure by sector and geographic location.

### Credit Policies

The credit policies of the Bank include a series of rules and measures which allow those persons involved in the credit process to have information on the procedures that must be followed to be in compliance with credit related functions. The Bank's view is that having comprehensive information when deciding to approve credit requests, is a key factor in making informed decisions and maintaining a healthy credit portfolio. All direct and indirect credits, as well as credit operations and guarantees classified as contingent assets are considered as part of the Bank's credit policy.

Establishment of authorization limits:

- The Board of Directors establishes credit policies and can delegate its authority to approve loans. The Board of Directors also establishes the authorization limits of officers, establishes procedures to monitor compliance, and can delegate these responsibilities to the Credit Committee and the Audit Committee.
- The Board of Directors establishes the authorization structure for the approval and renewal of credit facilities. The Credit Committee is responsible for implementing of the policies approved by the Board.
- The Credit Committee is responsible for risk management policies, including the establishment of authorization limits to approve and renew credit facilities, and establishment of limits for counterparty, geographic area and economic risk concentrations.

# Concentration and Exposure Limits

The Bank defines limits according to prudential norms and guidelines established by The Central Bank of The Bahamas and the Superintendence of Banks of Panama. The limits considered are primarily individual exposures to related parties as well as economic sector and geographic concentrations.

(Amount expressed in thousands of US\$ dollars)

### 21. Financial Risk Management (continued)

As of December 31, 2016 the Bank was in compliance with all nine of the Prudential Norms established by The Central Bank of The Bahamas. Prudential Norms require the Bank to maintain its base capital at a minimum of 5% of its total assets or 8% of its risk-weighted assets, as well as a liquidity ratio of at least 25% of total deposits, among others.

The Central Bank of The Bahamas requires banks to have a general allowance for loan losses of not less than 1% of the total loan portfolio net of cash collateralized loans. During 2016 no adjustments were necessary to the amount of the general allowance (2015: US\$585). Adjustments are recognized as an additional provision to the required total allowance for loan losses in the equity section of the statement of financial position. This is accomplished by means of an appropriation and transfer from retained earnings. Regulatory reserve by year-end 2016 amounts to a total of US\$2,806 (2015 US\$2,806), which includes both the required total allowance for loan losses calculated in accordance with IFRS (US\$1,079, 2015: US\$1,079) and the additional allowance (US\$1,727, 2015: US\$1,727). Compliant with IAS 39 the Bank reviews its loan portfolio on a monthly basis and estimates its potential credit loss to measure if the provision for loan losses is adequate.

The following table analyzes the Bank's most significant financial instruments that are exposed to credit risk:

	Loans		Secur	ities	Deposits with Banks		
	<b>2016</b> 2015		<b>2016</b> 2015		2016	2015	
	US\$ 000	US\$ 000	US\$ 000	US\$ 000	US\$ 000	US\$ 000	
Gross amount Allowance for loan losses	497,659 (1,079)	486,032 (1,079)	431,473	312,473	224,982	153,078	
Carryng amount	496,580	484,953	431,473	312,473	224,982	153,078	

## 21. Financial Risk Management (continued)

The Bank monitors the credit risk concentration by sector and geographic location. The analysis of credit risk concentration is shown below:

	Loans		Secur	ities	Deposits with Banks		
	2016	2015	2016	2015	2016	2015	
	<b>US\$ 000</b>	US\$ 000	US\$ 000	US\$ 000	US\$ 000	US\$ 000	
Concentration by sector:							
Corporate	328,223	328,626	250,075	177,469	-	-	
Consumer	169,436	157,407	-	-	-	-	
Others sectors			181,398	135,004	224,982	153,078	
	497,659	486,033	431,473	312,473	224,982	153,078	
Geographic concentration:							
Panama - off shore	78,597	112,129	-	-	1,196	966	
Caribbean	17,712	10,768	110,239	102,963	41	47	
United States of America	500	3,200	204,059	114,641	176,954	145,935	
Europe	869	270	3,219	67,089	31,595	6,129	
Peru	383,917	349,315	77,985	22,702	-	-	
Others	16,064	10,352	35,971	5,078	15,196		
	497,659	486,034	431,473	312,473	224,982	153,078	

The geographic concentration is based on the debtor's location in the case of loans, and on the issuer's location in the case of securities. When evaluating credit risk, management considers the following:

#### Impairment of loans, securities and deposits with banks

Impairment of loans, securities and deposits with banks is determined by comparing the carrying value of the asset with its estimated recoverable amount.

#### Financial assets past due but not impaired

Defined as loans and securities where contractual interest or principal payments are past due but are not considered to be impaired because of the level of security / collateral available and the stage of collection of amounts owed to the Bank.

#### Renegotiated loans

Renegotiated loans are those for which a significant variation in the original credit terms has been formally documented, due to difficulties in the payment capacity of the debtor, and the result of the current assessment does not permit them to be classified as standard performing loans.

(Amount expressed in thousands of US\$ dollars)

## 21. Financial Risk Management (continued)

#### Impairment allowance

The Bank has established impairment allowance to cover losses incurred on the loan and security portfolios.

### Charge-off policy

The Bank periodically reviews its loan portfolio to identify those loans that need to be written-off due to their non-collectability and does so up to the amount not covered by the collateral. For unsecured consumer loans, write-offs are calculated based on the amount past due. In the case of secured loans, the write-off is calculated after considering the value of collateral held.

The Bank periodically analyzes the loan portfolio to identify required impairment provisions calculated as the difference between the carrying value and the realizable value of security or collateral held. Impairment allowances are computed individually for loans with significant risks and collectively for groups of loans with similar credit risk characteristics. The Bank also uses estimates to establish a general impairment allowance based on historical write-off rates. The methodology and assumptions used to make these estimates are reviewed periodically.

The Bank holds guarantees and security for certain loans granted, comprised primarily of customers' deposits, securities and real-estate.

As at December 31, 2016, the Bank held as collateral on loans to customers primarily dollar deposits, equities, structured notes, debt instruments, among others, indistinctly.

#### b) Counterparty Risk

This is the risk that a counterparty does not comply with the settlement of a redemption, purchase or sale of securities.

Risk management policies establish counterparty limits that determine the maximum amount of net exposure to transactions not yet liquidated that the Bank is permitted to have with a given counterparty. The Assets and Liabilities Committee is responsible for identifying acceptable counterparties taking into consideration the counterparty's history with respect to the fulfillment of obligations, as well as other indications of it being able to comply with obligations in the future.

(Amount expressed in thousands of US\$ dollars)

#### 21. Financial Risk Management (continued)

#### c) Liquidity and Financing Risk

This is the risk that the Bank cannot comply with all of its obligations because of, among other reasons, an unexpected withdrawal of funds by depositors, the deterioration of the quality of the loan portfolio, the devaluation of securities, the excessive concentration of liabilities from one particular source, a gap between assets and liabilities, a shortage of asset liquidity, or the mismatch of long-term asset financing with short-term liabilities. The Bank manages its liquidity resources to honor liabilities at maturity under normal contractual terms.

#### Liquidity Risk Management

Risk management policies establish a liquidity limit in order to determine the amount of the Bank's assets that should be maintained in highly liquid instruments; as well as financing limits, leverage limits and duration limits.

The Board of Directors has established liquidity levels as to the minimum amount of available funds required to comply with such requirements and the minimum level of inter-banking facilities and other loan facilities that should exist to cover unexpected withdrawals. The Bank holds a short-term asset portfolio, comprised of loans and liquid investments to ensure sufficient liquidity.

The Bank's financial assets include unlisted equity investments, which generally are illiquid. In addition, the Bank holds investments in unlisted closed and open-ended investments funds, which may be subject to redemption restrictions such as side pockets or redemption gates. As a result, the Bank may not be able to liquidate some of its investments in these instruments in due time in order to meet its liquidity requirements.

#### Exposure to Liquidity Risk

A primary measure of liquidity is the Bank's net liquidity margin.

The Bank's liquidity index which is calculated by dividing liquid assets by total deposits is shown below:

	Decemb	<u>per 31,</u>
	2016	2015
	%	%
At year end	53%	45%
Average for the year	43%	39%
Maximum during the year	53%	45%
Minimum during the year	29%	35%

#### 21. Financial Risk Management (continued)

The table below shows the undiscounted contractual cash flows of the Bank's significant financial instruments on the basis of the earliest possible contractual maturity at the reporting date. The expected cash flows of these instruments could differ significantly from this analysis. For example, demand deposits from customers are expected to maintain a stable or increasing balance.

(Amount expressed in thousands of US\$ dollars)

## 21. Financial Risk Management (continued)

### (d) Market Risk

Market risk is the risk that changes in market prices, foreign exchange rates, interest rates and equity prices, as well as changes in net asset values of unlisted closed and open-ended investment funds, may affect the Bank's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing returns.

Risk management policies provide for compliance limits by financial instrument, limits with respect to maximum loss amounts that trigger the settlement of positions that caused such loss; and the requirement that, except with the approval from the Board of Directors, substantially all assets and liabilities are denominated in United States dollars.

### Market Risk Administration

The Board of Directors has determined that market risk should be monitored directly by the Credit Risk Committee which is comprised of members of the Board of Directors and executive personnel. This committee is responsible for developing policies to administer market risk. In addition, this committee is responsible for review and approval of policy implementation.

#### Cash flows and fair value interest rate risk

Cash flows and fair value interest rate risk are the risks of fluctuation of both the future cash flows and the value of a financial instrument due to changes in market interest rates.

The Bank establishes limits to interest rate risk and periodically, this exposure is monitored by the Risk Department and Risk Committee.

The following table summarizes the Bank's exposure based on the re-pricing terms of interest rates of financial assets and liabilities.

(Amount expressed in thousands of US\$ dollars)

### Exposure to Market Risk

Trading portfolios include those positions arising from market-making transactions where the Bank acts as principal with clients or with the market.

The net interest margin of the Bank may vary as a result of unexpected movements in interest rates.

(Amount expressed in thousands of US\$ dollars)

### 21. Financial Risk Management (continued)

As of December 31, 2016, the annual interest rates on deposits due to depositors ranged from 0.30% to 12.50% (2015: 0.10% to 11.00%).

In order to assess interest rate risks and their impact on the fair value of financial assets and liabilities, the Bank's management performs simulations to determine the sensitivity on financial assets and liabilities.

The sensitivity analysis prepared by the Bank measures the impact on the Bank's financial instruments from increases and decreases in market interest rates (assuming asymmetrical movement in yield curves with all other variables, in particular foreign currency rates, remaining constant) using a linear approach as shown below:

Loans Securities Deposits	<u>2016</u>	100bp Increase US\$ 000 (3,215) (4,603) 3,449 (4,369)	100bp Decrease US\$ 000 3,226 4,603 (3,463) 4,366
Loans Securities Deposits	<u>2015</u>	100bp Increase US\$ 000 (2,821) (4,188) 3,112 (3,897)	100bp Decrease US\$ 000 2,882 4,188 (3,180) 3,890

The total impact shown above represents the net (gain)/loss impact on profit or loss.

Overall non-trading interest rate risk positions are managed by the Central Treasury Department, which uses investment securities, advances to banks, deposits with banks and derivative instruments to manage the overall position arising from the Bank's non-trading activities.

#### Exchange rate risk

This is the risk that the value of a financial instrument changes as a consequence of fluctuations in foreign currency exchange rates, and other financial variables, as well as the market participants' reactions to political and economic events.

#### 21. Financial Risk Management (continued)

The table below summarizes the Bank's exposures to foreign currency exchange risk at December 31, 2016. Included in the table are the carrying amounts of the Bank's financial instruments, categorized by currency.

	December 31,			
	2016		2015	
	<b>US\$000</b>		US\$000	
Assets:	Euros	Soles	Euros	Soles
Deposits with banks	1,789	-	956	-
Securities	294	2,144	(1,722)	2,384
Total Assets	2,083	2,144	(766)	2,384
Liabilities:				
Demand deposits	1,592	-	775	-
Total Liabilities	1,592	-	775	_

Furthermore, the bank has exposure to a basket of other currencies as part of the portfolio of investments managed by PIMCO, for a net total of US\$976 (2015: US\$4,675).

#### (e) Other Market Price Risk

Other market price risk is the risk that the fair value of the financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or factors affecting all instruments traded in the market.

The following table sets out the concentration of securities at the reporting date:

	December 31,	
	2016	2015
	%	%
Equity investments:		
Exchange traded equity investments	3.53	1.43
Unlisted private equity investments	4.50	8.22
Total equity investments	8.03	9.65
Mutual funds:		
Funds invested with fund managers (1)	4.58	5.80
Unlisted closed and open ended investments funds	4.73	3.79
Total mutual funds	9.31	9.59
Debt securities:		
Exchange traded debt securitites	9.85	6.42
Unlisted private debt securities	9.13	6.20
Total debt securities	18.98	12.62
Total investment assets	36.32	31.86

(1) Funds available with fund managers include cash and U.S. Treasury bills, as reported by fund managers at December 31, 2016.

### 21. Financial Risk Management (continued)

Investment assets are placed in various industries. Some investments are placed in mutual funds which invest in particular sectors; other mutual funds, as well as equity investment vehicles, which invest in financial assets within certain risk profiles, regardless of the industry sector where they fall into.

Securities are concentrated in the following industries:

	December 31,	
	2016	2015
	%	%
Equity investments:		
Banks / financial services	4.91	4.70
Pharmaceutical	8.11	17.46
Fishing	0.16	0.19
Diversified (mining, energy, real-estate)	8.93	7.95
Mutual funds:		
Banks / financial services	5.44	5.69
Mining	2.09	1.63
Biotechnology	5.50	4.57
Diversified (telecom, industrial, building materials, energy,		
leisure and entretainment, etc.)	12.61	18.20
Debt securities:		
Banks / financial services	5.82	2.70
Pharmaceutical	4.79	6.40
Diversified (mining, energy, basic materials, etc.)	12.01	3.99
Funds invested with fund managers	29.63	26.52
-	100.00	100.00

#### (f) Operational Risk

Operational risk is the risk that losses may occur due to failure or weaknesses in the Bank's internal processes, persons or systems; and external events such as those from legal and regulatory requirements.

(Amount expressed in thousands of US\$ dollars)

### 21. Financial Risk Management (continued)

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. This responsibility is supported by the development of the following standards:

- Requirements for appropriate segregation of duties, including the independent authorization of transactions
- Requirements for the reconciliation and monitoring of transactions
- · Compliance with regulatory and other legal requirements
- Documentation of controls and procedures
- Requirements for the periodic assessment of operational risks, and the adequacy of controls and procedures to address the risks identified
- Requirements for the reporting of operational losses and proposed remedial action
- Development of contingency plans
- Training and professional development
- Ethical and business standards
- Risk mitigation, including insurance where deemed effective.

The policies established by the Bank are supported by a program of periodic reviews undertaken by the Internal Audit Department. The results of the Internal Audit Department's reviews are discussed with the management of the business unit to which they relate, and summary reports are submitted to the Audit Committee and senior management of the Bank.

#### (g) Capital Management

The Bank's policies on capital management are to maintain a robust capital base, with the ability to sustain the Bank's future growth. The Bank recognizes the need to maintain a balance between returns to shareholders and the adequacy of capital required by regulatory entities. From January 2016 onwards, the Central Bank of Bahamas requires licensees to include a capital charge for operational risk equal to the three-year average gross income of the Bank multiplied by a factor of 0.15. This charge is multiplied by 12.5 to calculate the Operational Risk-Equivalent-Assets. Operational Risk-Equivalent-Assets at December 31, 2016 were US\$106.

The Central Bank of The Bahamas requires the Bank to maintain capital of not less than 8% of its risk weighted assets. The Bank's capital ratio at December 31, 2016 was 23.79% (2015: 26.60%).

## 21. Financial Risk Management (continued)

	December 31,	
	2016	2015
	US\$ 000	US\$ 000
Total elegible capital	181,904	145,663
Total risk weighted assets	764,520	547,526
Capital adequacy ratio	23.79%	26.60%

### 22. Reclassifications

Some amounts in the financial statements as of December 31, 2016 were reclassified for purposes of comparison with the figures at December 31, 2015. These reclassifications had no effect relative importance on the financial position or statement of income of the Bank.

### 23. Subsequent Event

The Bank has evaluated the impact of all subsequent events through March 16, 2017, which is the date that the financial statements were available to be issued and has determined that there were no additional subsequent events requiring adjustment.
